

#### **Social Media Tips and Guidelines**

These tips and guidelines cover some of the more popular social media networks: Facebook, LinkedIn and Twitter. Remember, to promote your presence on these platforms, make sure you are providing links in your emails and other communication. If you have a more specific question, please contact webmaster@ena.org.

### **Social Media Guidelines**

ENA encourages members to use social media channels to raise awareness of the organization and its mission. Below are recommended guidelines for communicating via social media.

- 1. **Be Responsible.** Remember that nothing is truly private online so do not post items that are confidential or sensitive in nature. Social media networks should not be used to divulge or discuss proprietary information, internal documents, personal details about other people, or other confidential material.
- 2. **Consider Privacy of Others.** Don't publish or cite personal details and photographs about ENA members without their permission. Also consider privacy when tagging individuals in a post.
- 3. **Include Source Links.** You are encouraged to share links and articles on social media. It is a best practice to include the original source when referencing an article or information.
- 4. **Be Active.** Issuing relevant posts and engaging discussions will increase the visibility of your social media presence. Videos and pictures are shared more often than plain text posts. Use content from ENA's social media platforms to enhance your presence.
